# SGC LABELING SYSTEM

## Tape and Label Compliance System

REFERENCE: OSHA Construction Standard: 29CFR1926.51

Sanitation (a) Potable Water (1) An adequate supply of potable drinking water shall be provided in all places of employment.

(2) Portable containers used to dispense drinking water shall be capable of being tightly closed and equipped with a tap.

Water shall not be dipped from containers. (3) Any container used to distribute drinking water shall be clearly marked as to the nature of its contents and not used for any other purpose.

**THE ULTIMATE** safety seal for water coolers in the construction industry. One roll marks and seals approximately (38) ten-gallon coolers. When removed, it leaves no sticky residue that could attract airborne contaminants.

**WARNS DRINKERS** that dipping contents from the water cooler is strictly prohibited. It also provides additional space for documenting: Contents, Date Prepared, Times Prepared, Preparer's Initials, and Owner's Name. Each LABEL is designed to be used up to (3) times/day for (7) days. Labels are printed on durable, adhesive back, white vinyl stock.

### "THE TAPE"

**Item No. 90-TAPE**

Roll Size: 2" x 55 yd.

The image displays three vertical scaffold safety tags, each with a different color and level of warning:

- OK Tag (Green):** Features the word "OK" in large green letters. The text states: "THIS SCAFFOLD HAS BEEN ERECTED TO MEET FEDERAL/STATE OSHA REQUIREMENTS AND IS SAFE FOR WORK." It includes a "COMMENTS" section and a "DO NOT ALTER" section. The "LOADING SCHEDULE" table lists:
 

□ LIGHT DUTY	25 PSF
□ MEDIUM DUTY	50 PSF
□ HEAVY DUTY	75 PSF

 Fields for "ERECTED BY", "DATE ERECTED", and "COMPANY" are provided.
- CAUTION Tag (Yellow):** Features the word "CAUTION" in large yellow letters. The text states: "SCAFFOLD RELEASED FOR ACCESS FALL ARREST SYSTEM REQUIRED." It includes a checklist of safety features:
  - THIS SCAFFOLD IS MISSING:
    - ☐ HAND RAILS ON DECK
    - ☐ MID RAIL ON DECK
    - ☐ TOE BOARD ON DECK
    - ☐ INTERHEAD OBSTRUCTION ON LADDER ACCESS
    - ☐ DECK OPENINGS ON DECK
  - COMMENTS
 It also includes a "DO NOT ALTER" section, a "LOADING SCHEDULE" table (identical to the OK tag), and fields for "ERECTED BY", "DATE ERECTED", and "COMPANY".
- DANGER Tag (Red):** Features the word "DANGER" in large red letters. The text states: "KEEP OFF DO NOT USE THIS SCAFFOLD. THIS SCAFFOLD IS BEING ERECTED, TAKEN DOWN OR HAS BEEN FOUND DEFECTIVE." It includes a "DO NOT ALTER" section and fields for "ERECTED BY", "DATE ERECTED", and "COMPANY".

# ADULT CHOKING & CPR

## CONSCIOUS CHOKING

Cannot Cough, Speak, or Breathe

**Call 911**

■ After checking the scene for safety, and the injured or ill person, have someone **CALL 911**.

**1**

**GIVE 5 BACK BLOWS**

**2**

**GIVE 5 ABDOMINAL THRUSTS**

**3**

**REPEAT STEPS 1 AND 2 UNTIL THE:**

- Object is forced out.
- Person can cough forcefully or breathe.
- Person becomes unconscious.

**WHAT TO DO NEXT**

■ IF PERSON BECOMES UNCONSCIOUS—Carefully lower the person to the ground and begin CPR (if trained), starting with compressions.

■ Make sure **911** has been called.

## CPR No Breathing

**Call 911**

■ Ensure **911** has been called.

**1**

**GIVE 30 CHEST COMPRESSIONS**

Push hard, push fast in the middle of the chest, at least 100 compressions per minute.

- Push at least 2 inches deep.

**2**

**GIVE 2 RESCUE BREATHS**

Tilt the head back and lift the chin up.

- Pinch the nose shut and seal your mouth over the person's mouth.

Blow in for about 1 second to make chest clearly rise. Give second breath, one after the other.

**3**

**DO NOT STOP CPR UNTIL:**

- You find an obvious sign of life, such as breathing.
- An AED is ready to use.
- Another trained responder or EMS personnel take over.
- You are too exhausted to continue.
- The scene becomes unsafe.

**WHAT TO DO NEXT**

■ When an AED BECOMES AVAILABLE, use it immediately.

■ IF BREATHS DO NOT MAKE CHEST RISE—Rethink the head and give another rescue breath.

■ If chest still does not rise, continue CPR but open mouth and look for and remove object with a finger. If seen, between giving chest compressions and rescue breaths. Remove breathing barrier when giving chest compressions.

## SAFE LIFTING PROCEDURES

### 1. SIZE UP THE LOAD

Size up the load. Never attempt to lift a load that is heavier than your comfort level. Do not lift if you do not estimate that the load is heavy enough, bulky or will obstruct your vision. Use proper personal protection equipment.

### 2. SECURE YOUR FOOTING

Make sure you are wearing appropriate shoes. Select footwear. Align your body with the load. Face the load straight on. Adjust your footing and stance by placing one foot forward of the other.

### 3. BEND YOUR KNEES

Don't "back" your knees. Keep your head up and back straight. Spread your weight so both knees are bent to lift the object.

### 4. LIFT THE LOAD

Push up with your legs to utilize your strongest set of muscles. Tighten your abdominal muscles as you lift. Remember to breathe steadily when lifting. Keep the load close to your body as you come up.

### 5. CARRY THE LOAD

Lift the object to the carrying position. If it is necessary to change your direction when in the upright position be careful not to twist the body. Turn your body by changing the position of your feet. Always maintain steady breathing while carrying the load.

### 6. LOWER THE LOAD

Don't stop your knees when lowering the load to the floor from a waist high carrying position. Keep your back straight as the load descends to the floor, lowering the load with the arms and leg muscles.

## SPECIAL SAFETY TIPS

#### MECHANICAL ASSISTED LIFTING

The use of a hoist is required to assist in lifting, moving or lowering a patient. The hoist must be used in accordance with the manufacturer's manual and the facility's policy.

#### POOR POSTURE

Posture is the way you are most comfortable. Poor posture can cause muscle strain, back pain, neck pain, shoulder pain, poor posture (don't slouch).

#### BEFORE ANY LIFTING TASK

Identify the person you are lifting. Get the person's name, date of birth, weight and height. Obtain the person's consent.

#### ADJUST VISIBLE LOADS

Visible loads will attract your focus and keep you from seeing the person. If you are lifting a person, make sure you can see the person's face.

#### STUCK YOUR LOAD CAUSING INJURY

Don't panic. Stop the lift. Avoid forcing the lift. Call for assistance.

#### STANDING ON UNSTABLE SURFACES

Don't stand on unstable surfaces, such as wheels, when lifting or moving a patient.

#### LIFTING ABOVE YOUR HEAD

Don't lift above your head. Use a hoist to lift above your head.

#### PREVENT TIRE

Don't tire yourself. Take breaks. Don't overexert.

# HAZARDOUS MATERIALS QUICK REFERENCE GUIDE

## 3 STEPS FOR SAFE CHARGE USE

### Employees must:

1. Refer to the Safety Data Sheet (SDS) for proper chemical handling practices.
2. Receive proper training [before](#) using a chemical.
3. Wear all required Personal Protective Equipment (PPE).

## SDS QUICK REFERENCE SAFETY DATA SHEETS

### Employees Rights to Know Policy:

Safety Data Sheets describe you, if the hazardous material is toxic, corrosive, flammable and the potential physical hazards require a risk to the worker.

This company has SDS's on file for any hazardous material required to fill out a hazardous label on any hazardous materials.

We will not use hazardous materials to which you are not trained, therefore, to control our safety and health conditions, we are experienced and have safety equipment.

# OPERATING RULES FOR INDUSTRIAL TRUCKS

**1. GENERAL INFORMATION**

1.1. This document contains the operating rules for the industrial truck. It is the responsibility of the operator to read and understand these rules before operating the truck.

1.2. The operator must be trained and certified to operate the truck.

1.3. The operator must wear the seat belt and use the safety equipment provided.

1.4. The operator must not drink alcohol or use drugs before operating the truck.

1.5. The operator must not operate the truck if they are tired or ill.

1.6. The operator must not operate the truck if they are under the influence of medication.

1.7. The operator must not operate the truck if they are wearing headphones or other devices that impair their hearing or vision.

1.8. The operator must not operate the truck if they are carrying passengers.

1.9. The operator must not operate the truck if they are carrying loads that exceed the rated capacity.

1.10. The operator must not operate the truck if they are carrying loads that are not properly secured.

1.11. The operator must not operate the truck if they are carrying loads that are unstable or unbalanced.

1.12. The operator must not operate the truck if they are carrying loads that are obstructing their view.

1.13. The operator must not operate the truck if they are carrying loads that are blocking the exit path.

1.14. The operator must not operate the truck if they are carrying loads that are blocking the fire extinguisher.

1.15. The operator must not operate the truck if they are carrying loads that are blocking the emergency exit.

1.16. The operator must not operate the truck if they are carrying loads that are blocking the emergency stop button.

1.17. The operator must not operate the truck if they are carrying loads that are blocking the emergency stop switch.

1.18. The operator must not operate the truck if they are carrying loads that are blocking the emergency stop cord.

1.19. The operator must not operate the truck if they are carrying loads that are blocking the emergency stop lever.

1.20. The operator must not operate the truck if they are carrying loads that are blocking the emergency stop pedal.

**2. SAFETY RULES**

2.1. The operator must always wear the seat belt.

2.2. The operator must always use the safety equipment provided.

2.3. The operator must always look in all directions before moving the truck.

2.4. The operator must always maintain a safe distance from other people and objects.

2.5. The operator must always use the horn when necessary.

2.6. The operator must always use the lights when necessary.

2.7. The operator must always use the brakes when necessary.

2.8. The operator must always use the steering wheel when necessary.

2.9. The operator must always use the accelerator when necessary.

2.10. The operator must always use the emergency stop button when necessary.

2.11. The operator must always use the emergency stop switch when necessary.

2.12. The operator must always use the emergency stop cord when necessary.

2.13. The operator must always use the emergency stop lever when necessary.

2.14. The operator must always use the emergency stop pedal when necessary.

2.15. The operator must always use the emergency stop lever when necessary.

2.16. The operator must always use the emergency stop pedal when necessary.

2.17. The operator must always use the emergency stop lever when necessary.

2.18. The operator must always use the emergency stop pedal when necessary.

2.19. The operator must always use the emergency stop lever when necessary.

2.20. The operator must always use the emergency stop pedal when necessary.

**3. MAINTENANCE RULES**

3.1. The operator must always check the oil level before operating the truck.

3.2. The operator must always check the water level before operating the truck.

3.3. The operator must always check the battery level before operating the truck.

3.4. The operator must always check the tires before operating the truck.

3.5. The operator must always check the brakes before operating the truck.

3.6. The operator must always check the steering before operating the truck.

3.7. The operator must always check the accelerator before operating the truck.

3.8. The operator must always check the emergency stop button before operating the truck.

3.9. The operator must always check the emergency stop switch before operating the truck.

3.10. The operator must always check the emergency stop cord before operating the truck.

3.11. The operator must always check the emergency stop lever before operating the truck.

3.12. The operator must always check the emergency stop pedal before operating the truck.

3.13. The operator must always check the emergency stop lever before operating the truck.

3.14. The operator must always check the emergency stop pedal before operating the truck.

3.15. The operator must always check the emergency stop lever before operating the truck.

3.16. The operator must always check the emergency stop pedal before operating the truck.

3.17. The operator must always check the emergency stop lever before operating the truck.

3.18. The operator must always check the emergency stop pedal before operating the truck.

3.19. The operator must always check the emergency stop lever before operating the truck.

3.20. The operator must always check the emergency stop pedal before operating the truck.

## Your Business Logo and Message Imprinted on the Back!

### Top 10 Reasons To Buckle Up!

(Courtesy of the AAA Foundation for Traffic Safety.)

1. My car doesn't have an ejectable canopy.
2. Lying in a hospital is not my idea of a vacation.
3. Steering wheels don't make good pillows.
4. I never aspired to be a hood ornament.
5. A wheelchair is not my idea of a hot set of wheels.
6. I always wanted to fly, but not into a tree.
7. Tombstones are not the best way to get the last word.
8. I always hated statistics; I don't want to be one.
9. I faint at the sight of my own blood.
10. My family and friends need me.

**"For God sent not his Son into the world to condemn the world; but that the world through Him might be saved."**  
 - John 3:17

## FREE GIFT!

**"For the wages of sin is death, but the gift of God is eternal life through Jesus Christ our Lord."**

- Romans 6:23

If you have never accepted Jesus Christ as your personal Lord and Savior, we encourage you to do so today by praying the Salvation Prayer (Below). Receiving salvation through Jesus Christ is 100% FREE, and guaranteed to last forever!

*"Please contact us and let us know about your decision. We would love to hear from you."*

### SALVATION PRAYER

Jesus, I believe you are the Son of God.

I confess that I am a sinner in need of Your forgiveness.

I believe that You shed Your blood and died on the cross

to pay for my sins, and that You rose again.

I ask You to forgive me and wash away my sins with Your blood.

I choose to turn my back on my sinful ways and I choose to

follow Your ways, the rest of my life.

Come into my life, fill me with your Spirit and be my Lord.

In Jesus' name AMEN.
